PROFESSIONAL SUMMARY

B.Tech CSE student and aspiring Java Full Stack Developer with strong foundations in Data Structures, Algorithms, and Software Development. Skilled in building end-to-end web applications using Java, Spring Boot, MySQL, JavaScript, HTML, CSS, and Git/GitHub. Experienced in developing scalable REST APIs, database-driven applications, and responsive user interfaces. Passionate about problem-solving, system design fundamentals, and continuously learning new techstack.

TECHNICAL SKILLS

Languages:	Java, C, SQL, JavaScript (ES6+), Python, HTML5, CSS3
Frameworks:	Spring Boot, Spring MVC, Spring Security, JDBC, Hibernate ORM, JPA
Core Concepts:	Object-Oriented Programming (OOP), Java Collections Framework, Exception Handling, Multithreading SOLID Principles, RESTful APIs, DBMS and Java 8 features.
Developer Tools:	Git, GitHub, Postman, IntelliJ IDEA, VS Code, Maven, Docker, Deployment & Hosting (Render, Vercel)
Libraries:	JSON parsing (Jackson), JSON Web Tokens (JWT)

TECHNICAL PROJECTS

Student Management System API | Backend Project

Technologies: Java, Spring Boot, MySQL, Spring Data JPA, Hibernate, Maven, Postman

- Engineered a robust, production-ready RESTful API utilizing a clean layered architecture (Controller-Service-Repository) to securely process and manage student academic profiles and real-time course enrollments.
- Implemented structured CRUD methodologies alongside declarative data validation and centralized custom global exception handling, improving service reliability and data consistency.

RepoScope (GitHub Account Dashboard) | FullStack Project

Technologies: Java, Spring Boot, WebClient, Docker, HTML/CSS/JavaScript, GitHub REST APIs, Spring Security

- Developed the backend using Spring Boot — built REST APIs that fetch and process live data from the GitHub API
- Solved real debugging challenges along the way — from server errors to backend-frontend data mismatches.
- Built the entire frontend from scratch using HTML, CSS, and JavaScript, then containerized and deployed the full-stack app using Docker on Render

Personal Developer Portfolio Website | Frontend Project

Technologies: HTML5, CSS3, JavaScript (ES6), Git, GitHub Pages

- Designed and constructed an interactive, responsive portfolio showcase with optimized UI/UX patterns to elegantly display engineering credentials, project architectures, and contact infrastructure.
- Configured optimized build architectures and successfully automated deployment through modern version control paradigms directly onto GitHub Pages.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science and Engineering

FETAgra College (Dr.A.P.J.AbdulKalamTechnicalUniversity)

Aug 2024 - Jul 2028

Senior Secondary (12th Grade), CBSE

Gyan Deep Public School

Apr 2022 - Mar 2023

Secondary (10th Grade), CBSE

Nav Jagriti Public School

Apr 2020 - Mar 2021

CERTIFICATIONS & SIMULATION WORK

SoftwareEngineeringVirtualExperience– JP Morgan Chase & Co.

Credential issued via Forage

Jun 2026

- Executed comprehensive codebase analyses and structural debugging tasks modeling foundational enterprise environments and workflows.
- Acquired practical context regarding continuous integration cycles and collaborative code development practices typical of real-world agile financial software delivery.

Software Engineering Virtual Experience – Walmart Global Tech

Credential issued via Forage

Jun 2026

- Simulated developer responsibilities addressing scalable processing and architectural problem solving for modern high-availability retail systems.

Software Engineering Virtual Experience – Wells Fargo

Credential issued via Forage

Jun 2026

- Analyzed mock real-world software specifications to refine system diagnostics, logic optimization, and baseline code readability.
